Edesign curriculum lesson 6 answers

eDesign Help includes a wide range of instructional resources to help you and your students maximize your productivity when creating your yearbook in eDesign. eDESIGN CURRICULUM The eDesign Curriculum is a set of eight classes designed to give your students a comprehensive understanding of eDesign and familiarize them with the essential eDesign features. Each lesson is built around a general eDesign topic and is presented in a video module that guides students through the individual tutorials. Each class has an accompanying student guide that can be downloaded from eDesign Help. The student guide has requested accompanying notes to increase student engagement and strengthen key points. The student guide also includes exercises that a student can complete after each lesson to strengthen their learning. In eDesign Help, choose the link links for eDesign Curriculum and you'll see a listing for each of the classes, along with a link to download the corresponding student guide. LESSON 1: NAVIGATE YOUR BOOK ... Navigating the ladder ... Using the Practice Spread Opening, Closing and Saving Pages... Why and when pages are locked LESSON 2: USING THE IMAGE LIBRARY ...
